

RESTORE ABA & SPEECH THERAPY

Speech Pathology

Supporting Communication That Matters

Sydney · Brisbane · Melbourne · In-home & Telehealth

Communication supports choice, relationships, learning, independence and participation.

Restore's Speech Pathology services focus on helping individuals communicate more effectively within the environments that matter to them.

What we support

How it works

Who provides it

Speech Pathology May Support

- Speech clarity
- Speech sounds
- Expressive language
- Receptive language
- Functional communication
- Social communication
- Conversation and interaction
- Augmentative and Alternative Communication (AAC)
- Communication during everyday routines
- Literacy-related communication needs, where appropriate
- Greater communication independence

Feeding and swallowing

Feeding or swallowing services should only be provided by appropriately qualified practitioners working within their competence and professional scope.

How Does Speech Pathology Work?

- 1 Initial Consultation**
We discuss communication strengths, concerns, priorities and everyday environments.

- 2 Communication Assessment**
A qualified Speech Pathologist completes appropriate assessment.

- 3 Goal Development**
Meaningful communication goals are established collaboratively.

- 4 Individualised Therapy Plan**
The Speech Pathologist develops appropriate intervention strategies.

- 5 Therapy**
The Speech Pathologist provides intervention, and where appropriate, selected activities may also be supported by an Allied Health Assistant under professional direction.

- 6 Everyday Application**
Skills are practised with an emphasis on functional use across relevant environments.

- 7 Review**
Progress is monitored and therapy is modified when appropriate.

Who Provides Speech Pathology?

Speech Pathologist

Typical qualifying education includes:

- Accredited Bachelor's degree in Speech Pathology; or
- Qualifying Master's degree in Speech Pathology.

Speech Pathologists may also undertake additional professional development in areas such as:

- Autism and neurodevelopment
- AAC
- Language
- Social communication
- Literacy
- Feeding and swallowing
- Disability practice

Professional credentials may include Certified Practising Speech Pathologist (CPSP) where applicable.

The Speech Pathologist retains responsibility for professional assessment, clinical recommendations, treatment planning and clinical decision-making.

Who May Assist With Regular Therapy Activities?

Allied Health Assistant / Therapy Assistant

Where clinically appropriate, an Allied Health Assistant may support selected clinician-developed activities under appropriate supervision.

Possible educational backgrounds include:

- Certificate III in Allied Health Assistance
- Certificate IV in Allied Health Assistance
- Relevant diploma-level qualifications
- University study in Speech Pathology or another allied-health discipline

The assistant does not replace the Speech Pathologist for functions requiring professional clinical judgement.

How the Team Works

Speech Pathologist

Assessment → Goals → Therapy Plan → Clinical Oversight

Speech Pathologist and/or Allied Health Assistant, where appropriate

Therapy Activities → Practice → Observations → Feedback

Speech Pathologist

Clinical Review → Progress Evaluation → Therapy Modification
